

# FLY-O-FLASH

FLY-O-FLASH is an advanced insect trap that uses UV light to attract flying insects. The high-quality ultraviolet bulbs draw insects towards electrified metal grids, where they are quickly eliminated by a high-voltage current. This energy-efficient device is safe for humans and pets, making it ideal for use in homes, restaurants, hotels, and offices. Effective over an area of 80 sq. meters, it's best positioned near doors or windows for optimal results.

## Targets:

- Flying insects

Always read and follow label instructions.

# FLY-O-FLASH: ILLUMINATE, ATTRACT, ELIMINATE

## - YOUR ULTIMATE INSECT DEFENSE

### Features:

- Fly-O-Flash uses the specific wavelength of a UV light tube to attract insects.

### Range of use and best usage :

- Suitable for homes, restaurants, hotels, and offices
- The effective area of this product is 80 sq. mtr. with the correct using method
- The best location is at the entrance of doors or windows
- Please hang it at a height of 1.8-2.20 meters and the distance from the wall should be 0.3 meters.

### Special Function :

- Easy to use with no side effects to human beings and animals
- This works on the mechanism of attracting insects with good quality ultraviolet bulbs which is then, eliminated by the high voltage current that runs through the electrified metal grids near the bulbs
- Circuit design with a limit of electric current, low energy loss, and high efficiency

- Specifications:**
- Rated Voltage: AC220V-240V/HZ
  - Power: 2 X 20W
  - Size: 650 L x 90 W x 282 H (mm)

**Packing:** 1 unit in 1 carton box.

Always read and follow label instructions.
