# ARMETHRIN 10% EC: ULTIMATE PEST CONTROL FOR THRIVING CROPS AND MAXIMUM YIELDS

## Active Ingredient:

Cypermethrin 10% EC

## Features:

- Controls the pests by its contact and stomach poison action
- Very effective in controlling the pests immediately after application even at lower doses
- Does not leave residues in the crops and due to this quality it can be applied a week before the harvest of the crop

## Mode of Action:

ARMETHRIN 10% EC disrupts insect nerve function by blocking sodium channels, causing paralysis and death. This effective action targets multiple pests.

## Recommended Dose:

220 ml to 300 ml/ha

## Antidote:

- No specific antidote is known
- Treat symptomatically
- Antihistamines may be given to control the allergies

## Packing:

250ml, 500 ml, 1 L

Always read and follow label instructions.
