

ARBUDA METAL RBS

The ARBUDA Metal Rodent Bait Station is manufactured for effective rodent control, meeting stringent audit requirements for pharmaceutical companies. Key features include:

- **High-quality metal construction for durability and reliability**
- **Efficient rodent trapping & bating capabilities**
- **Complies with pharmaceutical audit standards**

Always read and follow label instructions.

DURABLE METAL BAIT STATION - EFFICIENT RODENT CONTROL, AUDIT-COMPLIANT SOLUTION.

Description and Features:

- Protects bait from dust and appears as a safe place for rodents for quick feed, allowing them to feel more secure so they may consume more bait
- Keeps non-targeted species including pets, livestock, wildlife, and children away from toxic baits
- Helps to prevent accidental spillage and offers the applicator easy access to bait, making it easier to determine the amount of bait consumed by rodents, and to refill
- It can hold glue pads properly so rats cannot escape easily

Packing:

24 bait station in 1 carton box
