Always read and follow label instructions.

LAMBDA-5: PRECISION POWER FOR UNMATCHED PEST CONTROL ACROSS YOUR CROPS

Active Ingredient: Lambdacyhalothrin 5% EC

Features:

- Lambdacyhalothrin disrupts the normal functioning of the nervous system in insect pests, causing paralysis & then death. It has a long residual activity.
- Effective against a broad range of insect pests, including Aphids, Borers, and Thrips
- This insecticide has a fast-acting formula that quickly kills insect pests after they come into contact with it.

Mode of Action:

Lambda-cyhalothrin is a non-systemic insecticide that has contact and stomach action.

Recommended Dose:

- For Cotton 550-600 ml /450 L of water/ha. For Rice: 300-400 ml /450 L of water/ha. For Brinjal 250-300 ml /450 L of water/ha. For tomato: 250-300 ml /450 L of water/ha

Antidote:

- No specific antidote is known. Treat symptomatically.
- Antihistamines may be given to control the allergies.
